

THEMED SESSIONS: Back to the 80's Technopop

The 1980s marked the explosion of synthesizers and a new way of understanding electronic music. Our Back to the 80's Technopop session recovers the most sophisticated essence of that decade, focusing on the synthetic sounds and melodies that defined the future of pop. This is an exclusive selection that avoids the conventional, focusing on the great New Wave and Synth-Pop anthems to guarantee a unique retro-vanguard atmosphere.

TECHNICAL & OPERATIONAL PROPOSAL

EXCLUSIVE CONCEPT:

A DJ Set specifically dedicated to the select electronic side of the 80s.

We prioritize the sonic quality of the original synthesizers over the era's overplayed commercial hits. These sessions are mixed with technical precision, maintaining a constant pulse that invites both attentive listening and rhythmic enjoyment.

ATMOSPHERE:

A perfect configuration for late-night slots or sunsets in venues seeking a differentiated identity.

It attracts a musically cultured audience that values sound design, creating a modern, elegant European club environment with a high-level nostalgic touch.

ADDED VALUE:

By offering such a specific and curated theme, the establishment stands out from generic musical proposals.

This service raises the standard of nightlife, increases guest stay in the music area, and reinforces the venue's image of exclusivity and modernity.

AVAILABLE CONFIGURATIONS

Integrated Vintage Setup:

High-end digital players that guarantee superior acoustic fidelity in every mix.

Real and creative execution without the use of a computer, integrated with the venue's sound system

Aesthetic Vintage Setup:

Professional booth in a black and aluminum finish. Includes the option to incorporate linear LED lighting or geometric design props for a visual setting consistent with the style.

Autonomous Techno Setup:

A complete high-definition sound system independent of the venue's network.

Configuration optimized to project the clarity of synthetic sounds and ensure an immersive audio experience.
